DID YOU KNOW?

- Cardiovascular disease is the leading cause of death in the United States, and it is preventable with changes to lifestyle, stress management, and proper medical treatment.
- Cardiovascular disease refers to a range of different conditions
 - Heart Attack
 - Stroke
 - Heart Failure
 - Arrhythmia
 - Peripheral Artery Disease

CHERISH PARTNER SPOTLIGHT

The mission of the Healthy Heart Community Prevention Project is to promote heart health and to eliminate disparities associated with cardiovascular disease in vulnerable communities. We believe in providing good quality evidence-based health information to educate individuals, families and community groups about their health, to decrease their risk for cardiovascular disease, stroke and diabetes. Healthy families lead to healthy communities and good quality of life
